

ACME QUARTERLY REPORT – Q3 2026

=====

EXECUTIVE SUMMARY

Revenue for Q3 2026 reached \$4.2M, up 18% quarter over quarter. The API platform now serves 12,000 daily active developers. Churn fell to 2.1% following the launch of the retention program in July.

KEY METRICS

- Revenue: \$4.2M (+18% QoQ)
- Daily active developers: 12,000 (+31%)
- Net revenue retention: 118%
- Gross margin: 79%

PRODUCT HIGHLIGHTS

The Agentic Gateway shipped to general availability in August. Early adoption exceeded forecasts; 340 enterprise accounts enabled the feature within the first three weeks. Latency at p99 improved from 420ms to 180ms after the edge caching rollout.

RISKS AND CONCERNS

Hiring for the platform team remains behind plan. Two senior SRE roles have been open since May. Regulatory review of the EU data residency program is expected to conclude in November.

OUTLOOK

We forecast \$4.8M revenue in Q4 driven by seasonal enterprise renewals and continued adoption of the usage-based pricing model introduced this quarter.
